
DEVELOPING THE SMALL AND MEDIUM ENTERPRISES IN AGRICULTURE SECTOR IN THE PROVINCE OF HOA BINH REALITY AND SOLUTIONS

Nguyen Thi Bich Diep

Vietnam National University of Forestry

SUMMARY

This study focuses on evaluating the development status of small and medium enterprises in the agriculture sector in Hoa Binh province in terms of quantity, size, structure, and quantity of their operation. This study also deeply analyzes the situation of enterprises restructuring according to the characteristics of capital and business sectors. The results, as well as the efficiency of production and business activities, are assessed through the turn over the target, labor quantity, capital use, and other effective indicators. The research results show that small and medium enterprises development is suitable for orientation of development in the province, increasing quantity and size of enterprises, improving capital, production, and business activities, solving job problems for rural workers, reducing poverty and eliminating hunger. At the same time, the study points out the barriers that need solving such as supporting policies, the quantity of labor, production efficiency and business activities. From the above assessment, some solutions are proposed for comprehensive development of small and medium enterprises in Hoa Binh province in the coming time.

Keywords: Agriculture sector, small and medium enterprises, supporting policies.
